Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with
 Mr. Robert Mueller (Reg. No. 35,043) on August 12, 2005.

In the claim:

All previous copies of claim 3 has been replaced with the following:

3. A computer-implemented method of progressive time stamp resolution in a multimedia presentation, comprising the steps of:

supplying a player of a multimedia presentation with information comprising two labels, one for a multimedia object's start time and one for the multimedia object's end time relative to other multimedia object start and stop times, and three durations, a maximum duration and a preferred duration for each multimedia object prior to playback of the multimedia object; and

resolving the durations of the multimedia objects using said information based on actual multimedia object durations and arrival of information of

Application/Control Number: 09/200,985

Art Unit: 2176

ŀ

multimedia objects to be played, wherein the step of resolving comprises the steps of:

collecting all the dependency relations for a label Px, by taking all objects n that have Px as the label for their end time:

 t_n + minimum(n) $\leq t_x \leq t_n$ + maximum(n) n = 1,...,N

where t_n is the start time of object n, and N is the number of objects;

using the N relations to calculate the tightest bounds on $t_{\boldsymbol{x}}$

$$\min \{t_x\} \le \{t_x\} \le \max\{t_x\}$$

with

 $min\{t_x\} = max\{t_x + minimum(n)\}$ n = 1,...,N

$$\max\{t_x\} = \min\{t_x + \max(n)\} \quad n = 1,...,N;$$

recalculating bounds on the duration of each object n, by using:

$$duration(n)=t_{x-}t_n$$

to get

 $\min\{t_x\}$ - $t_n \le \operatorname{duration}(n) \le \max\{t_x\}$ - $t_n = 1,...N$; and

recalculating the preferred duration of each object n according to the

process:

if $(preferred(n) \le min\{t_x\} - t_n)$ then

 $preferred(n) = min\{t_x\}-t_n$

else if (preferred (n) > $\max\{t_x\}$ - t_n)

Application/Control Number: 09/200,985

Art Unit: 2176

4

then preferred (n) = $\max\{t_x\}$ - t_n

end if.

3. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Maikhanh Nguyen whose telephone number is (571) 272-

4093. The examiner can normally be reached on Monday - Friday from 9:00am - 5:30

pm. If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Heather Herndon can be reached on (571) 272-4136.

The fax phone number for the organization where this application or proceeding is

assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published

applications may be obtained from either Private PAIR or Public PAIR. Status

information for unpublished applications is available through Private PAIR only. For

more information about the PAIR system, see http://pair-direct.uspto.gov. Should you

have questions on access to the Private PAIR system, contact the Electronic Business

Center (EBC) at 866-217-9197 (toll-free).
